# HAVER CSA - Evaluation Software for Sieve Analysis.

The HAVER CSA software enables PC-aided analysis of standard sieve systems. Three versions of this software are available which differ in the scale of functions. The results of measurements are documented for quality assurance purposes and can be introduced into statistics and

reports due to the complex data processing.

## Your advantages at a glance

- Simple and precise reports
- User friendly and self-explanatory user interface
- Complex graphical display and

detailed documentation

- Works under Windows 7 and Windows 10
- Connection of different types of scales and test sieve shakers
- Customized design of test reports
