

# Series ME Tear Testers, Elmendorf Type For Plastic Film, Sheet, and Paper

## Full-Featured Mechanical Tear Testers for Film and Paper

Advanced mechanical tear testers available with 800 gram, 1600 gram, 3200 gram, and 6400 gram pendulums. Oakland Instruments' ME Series Tear Tester answers your need for a simple to use, stand-alone, non-instrumented tester, for measuring tear resistance of film, paper, sheet, laminated materials, and converted products.

## Improved Film and Sheet Quality, Increased Profit Margins

The ME Series Elmendorf Tear Tester is a proven tool for more closely controlling tear characteristics to speed your:

- Production and additives settings and adjustments.
- Research and development of new film and sheet products.
- Inspection of incoming film and sheet products.
- In-process checks to ensure on-spec product for converting operations.

## Meets ASTM & TAPPI

Meets specifications of ASTM D 1922, TAPPI T-414, ISO 1974, plus additional applicable International Standards for Propagation Tear Resistance Testing of Plastic Film, Paper and Sheeting.

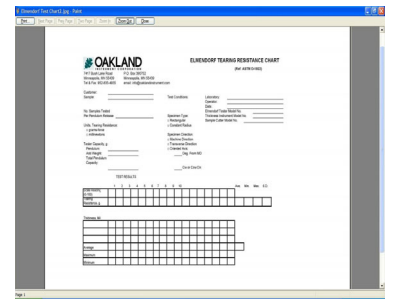

## Advanced Technical Features and Accessories

### Calibration Certificates for Pendulums

Each tear tester Pendulum is serialized and certified to assure conformance to your ISO and other standards for quality control.

### Accessories Available

Interchangeable pendulums for testing a wide range of materials with a single tester, calibration weights for single point calibration verification, integrated cutting mechanisms for high volume testing applications. Each system includes sample Data Sheets, conforming to ASTM D-1922 reporting requirements, in Microsoft Excel™ format. Sample Cutters, Cutting Templates, and Thickness Micrometer Systems are also available to provide a complete tear resistance testing system for your laboratory or plant floor.

### Oakland Instrument Corp.

Oakland Instrument Corp. specializes in the design, manufacture and distribution of test, measurement and control systems for the plastics, packaging, and paper industries.

### Customer-Driven

We team with our customers to help them solve their quality- and process-control problems.

### Technology-Based

Our applications knowledge and engineering depth allow us to offer both standard and custom systems based on industry-leading technology.
